Subject: COVID-19 March 10th update

Dear members of the PCA Community,

We continue to monitor the situation as the number of COVID-19 infections continues to increase around the world. In France several regional clusters of infection have been identified and schools and universities closed. Paris is not among the clusters and PCA continues to operate normally, with the previously announced restrictions on field trips and travel.

Unless new public health directives are issued we will hold our Open House this Saturday.

All members of the PCA community are reminded to practice good habits (e.g., hand washing, coughing and sneezing into single-use tissues, avoiding touching your face) and to acknowledge that a situation of uncertainty like the one we are currently living in can create anxiety. Don't hesitate to reach out to members of staff or to our counselors, and to follow the [steps suggested by the WHO](#): talk to people you trust can help, maintain a healthy lifestyle, don't smoke or use alcohol or drugs to deal with your emotions, get the facts from a trusted source such as the CDC or the WHO and limit media coverage that you perceive as upsetting.

For more information on prevention and planning visit the [PCA portal](#) and [dedicated webpage](#).

Sincerely,

Linda Jarvin, PhD
